INDEX

A

Abbot, Maude (John Parkinson). 139.
Angina pectoris, electrocardiographic changes after anoxæmia and exercise in (Courtenay Evans and Geoffrey Bourne). 69.
Aorta, idiopathic cystic medial necrosis of the (D. H. Davies). 166.
Atrial septal defect (D. Evan Bedford and others). 37.
Auricular fibrillation, chest lead electrocardiograms in (William Evans). 247.

B

Bain, C. W. Curtis : Variable ventricular complexes in heart block, and their relation to bilateral bundle branch block. 75.
—— (and S. Wray) : Ruptured aortic valve with mycotic aneurysm due to acute bacterial endocarditis. 132.
Barber, Hugh (and G. R. Osborn) : A fatal case of myocardial contusion. 127.
Bedford, D. Evan : Charles Laubry. 145.
—— (and J. L. Lovibond) : Hydrothorax in heart failure. 93.
—— (and others) : Atrial septal defect. 37.
Bilateral bundle branch block, variable ventricular complexes in heart block and their relation to (C. W. Curtis Bain). 75.
Bourne, Geoffrey: Changes in renal function and persistence of the murmur after ligature of a patent ductus arteriosus. 228.
—— (and Courtenay Evans): Electrocardiographic changes after anoxæmia and exercise in angina of effort. 69.
Bramwell, Crighton (and A. Morgan Jones): Coarctation of the aorta; the collateral circulation. 205.

C

Cardiac Society of Great Britain and Ireland, Proceedings of the. 259.
Chamberlain, Francis L. (and others): Inversion of the T waves in lead II caused by a variation in position of the heart. 233.
Changes in renal function and persistence of the murmur after ligature of a patent ductus arteriosus (Geoffrey Bourne). 228.
Chest lead changes as the sole electrocardiographic evidence of heart disease (Ralph M. Sussman and Abraham Lieberson). 13.
Chest lead electrocardiograms in auricular fibrillation (William Evans). 247.
Chest lead electrocardiography in the diagnosis of pulmonary embolism (Paul Wood). 21.
Coarctation of the aorta; the collateral circulation (Crighton Bramwell and A. Morgan Jones). 205.
Coarctation of the aorta with patent ductus arteriosus (Gibson Graham and J. D. Olav Kerr). 121.
Collateral circulation in coarctation of the aorta (Crighton Bramwell and A. Morgan Jones). 205.
Cooke, W. T. (and Paul D. White): Tricuspid stenosis, with particular reference to diagnosis and prognosis. 147.

D

Davies, D. H.: Idiopathic cystic medial necrosis of the aorta. 166.

E

Eden, K. C. (and W. R. Trotter): Total thyroidectomy for heart failure: an unusual case. 200.
Electrocardiogram of the Stokes-Adams attack (John Parkinson and others). 171.

Electrocardiographic changes after anoxæmia and exercise in angina of effort (Courtenay Evans and Geoffrey Bourne). 69.
Evans, Courtenay (and Geoffrey Bourne): Electrocardiographic changes after anoxæmia and exercise in angina of effort. 69.
Evans, William: Chest lead electrocardiograms in auricular fibrillation. 247.
—— (and others): The electrocardiogram of the Stokes-Adams attack. 171.
—— (and Thomas Paxon): A comparison of the mercurial diuretics used in heart failure. 112.

G

Gillespie, J. E. O'N.: Pulmonary venous return via the superior vena cava. 241.
Graham, Gibson (and J. D. Olav Kerr): Coarctation of the aorta with patent ductus arteriosus. 121.
Graybiel, Ashton (and others): Inversion of the T waves in lead II caused by a variation in position of the heart. 233.

H

Heart disease, chest lead changes as the sole electrocardiographic evidence of (Ralph M. Sussman and Abraham Lieberson). 13.
Heart failure, a comparison of the mercurial diuretics used in (William Evans and Thomas Paxon). 112.
Heart failure, hydrothorax in (D. Evan Bedford and J. L. Lovibond). 93.
History of mitral stenosis (Humphry Rolleston). 1.
Hydrothorax in heart failure (D. Evan Bedford and J. L. Lovibond). 93.

I

Idiopathic cystic medial necrosis of the aorta (D. H. Davies). 166.
Inversion of the T waves in lead II caused by a variation in position of the heart (Paul D. White and others). 233.

J

Jones, A. Morgan (and Crighton Bramwell): Coarctation of the aorta: the collateral circulation. 205.

K

Kerr, J. D. Olav (and Gibson Graham): Coarctation of the aorta with patent ductus arteriosus. 121.

L

Laubry, Charles (D. Evan Bedford). 145.
Lieberson, Abraham (and Ralph M. Sussman): Chest lead changes as the sole electrocardiographic evidence of heart disease. 13.
Lovibond, J. L. (and D. Evan Bedford): Hydrothorax in heart failure. 93.

M

Mercurial diuretics used in heart failure (William Evans and Thomas Paxon). 112.
Mitral stenosis, history of (Humphry Rolleston). 1.
Myocardial contusion, a fatal case of (Hugh Barber and G. R. Osborn). 127.

O

Osborn, G. R. (and Hugh Barber): A fatal case of myocardial contusion. 127.

P

Papp, Cornelio (and others): Atrial septal defect. 37.
——, The electrocardiogram of the Stokes-Adams attack. 171.
Parkinson, John: Maud Abbot. 139.
—— (and others): Atrial septal defect. 37.
—— (and others): The electrocardiogram of the Stokes-Adams attack. 171.
Patent ductus arteriosus, changes after ligature of (Geoffrey Bourne). 228.
Proceedings of the Cardiac Society of Great Britain and Ireland. 259.
Pulmonary embolism: diagnosis by chest lead electrocardiography (Paul Wood). 21.
Pulmonary venous return via the superior vena cava (J. E. O'N. Gillespie). 241.

R

Ritchie, W. T.: Karel Frederik Wenckebach. 141.
Rolleston, Humphry: The history of mitral stenosis. 1.
Ruptured aortic valve with mycotic aneurysm due to acute bacterial endocarditis (C. W. Curtis Bain and S. Wray). 132.

S

Schnur, Sidney: T wave inversion, heart size, and functional capacity. 30.
Stokes-Adams attack, The electrocardiogram of the (John Parkinson and others). 171.
Sussman, Ralph M. (and Abraham Lieberson): Chest lead changes as the sole electrocardiographic evidence of heart disease. 13.

T

T wave inversion, heart size, and functional capacity (Sidney Schnur). 30.
Thyroidectomy, total, for heart failure: an unusual case (W. R. Trotter and K. C. Eden). 200.
Tricuspid stenosis, with particular reference to diagnosis and prognosis (W. T. Cooke and Paul D. White). 147.
Trotter, W. R. (and K. C. Eden): Total thyroidectomy for heart failure: an unusual case. 200.

V

Variable ventricular complexes in heart block, and their relation to bilateral bundle branch block (C. W. Curtis Bain). 75.

W

Wenckebach, Karel Frederik (W. T. Ritchie). 141.
White, Paul D. (and others): Inversion of the T waves in lead II caused by a variation in position of the heart. 233.
—— (and W. T. Cooke): Tricuspid stenosis, with particular reference to diagnosis and prognosis. 147.
Wood, Paul: Pulmonary embolism: diagnosis by chest lead electrocardiography. 21.
Wray, S. (and C. W. Curtis Bain): Ruptured aortic valve with mycotic aneurysm due to acute bacterial endocarditis. 132.
